April General Meeting

“Overnight Concrete Pavement Replacement”

How does Chicago handle concrete pavement replacement (not patching) when their AADTs are nearly three times the traffic count of I-90 thru Spokane with only one additional travel lane?

How do you replace an average of 630 feet of pavement a night on a 9.7 mile stretch of California interstate?

Precision set, precast concrete panels.

Can they be used here?

Oldcastle’s engineering manager Rob Holland, a Gonzaga alumnus and sales manager Blake Johnson, P.E., a United States Merchant Marine Academy graduate, will share their experience with both the unique design attributes of precast concrete and modular construction techniques.

Upcoming Events.....

MAY 9th SPECIAL Meeting

WSU Student Chapter
“Steel Bridge Competition”

June 15, 2017

Engineers Without Borders
“El Salvador”

HEC-RAS Hydraulic Modeling May 8 & 9 (Monday & Tuesday)

Required Minimum Class Size
Registration by April 27
Registration www.norfma.org

Alan Gay 509-328-5139
